Professional Summary

Full Stack Web Development - UNC . Proficiency ranging from HTML to the MERN Stack. Using the remote repository system of GitHub, completed three (3) key projects further developing key skills for full stack web applications.

Technical Skills

- JavaScript ES5/ES6+
- CSS3
- HTML5
- SQL
- NoSQL,
- MongoDB
- MySQL

- GitHub
- Express
- React
- Node
- Handlebars
- jQuery
- Bootstrap
- Slack

Projects

- **Meal Maker | GitHub link: http://bit.ly/3USQYo7 | live link: http://bit.ly/3FmLFHI**
  - The project grabbed specific endpoints that the user input into a form and populated 5 images of potential meals with cook time, serving, and source printed on the card. The image was also an anchor to bring the user to the website to learn how to create the meal.
  - My roles were creating the CSS layout, making the application interactive with jQuery UI, and helping with local storage.
  - Tools: HTML, CSS, Bulma, JavaScript, GitHub JQuery, Spoonacular, Cocktaildb
- **Tik Tak | GitHub link: http://bit.ly/3BvYPB7 | live link: http://bit.ly/3hnL3JV**
  - Created a social media, yik-yak, application using the Model View Controller method to create a clean application by separating the database, routes, and handlebars.
  - My first role was doing some back end work on the models and creating routes for the pages to populate. I also worked on handlebars to capture the database information and format our page with bootstrap and CSS.
  - Tools: HTML, CSS, Bootstrap, JavaScript, GitHub, Node, Express, MySQL, Anime.js
- **OurPlace | GitHub link: http://bit.ly/3JadxT5 | live link: http://bit.ly/3XgUZ7w**

- This application is a roommate finder where users can filter through parameters like gender, rent, location, and pet friendly. This application utilized React.js, Graphql, and Mongodb.
  - For this application I worked on many different aspects including: styling, outline, models, and the mutations.

Education

Bachelor of Biological Sciences Biology
University of Southern Mississippi
Hattiesburg, MS | December 2019

Full Stack Web Development JavaScript
University of North Carolina at Chapel Hill
Certification | January 2022

Work History
